

X-Tray is a healthcare transaction manager that handles data-flow in diagnostic imaging departments. A flexible and scalable integration is provided by X-Tray as the link between information systems, archiving systems and acquisition equipment.

Flexibility

Conforming to standards is fundamental for connectivity. However, real world issues demand more than simply meeting the requirements of technical specifications. Our knowledge combined with X-Tray's flexibility is equally important in providing a complete and streamlined solution.

Connectivity

Each imaging department is unique with its own requirements and capabilities for various transactions. Normally the integration scenario calls for the use of numerous standards, both public and proprietary. X-Tray offers a structured platform for providing connectivity solutions with a wide range of interfaces available.

Supported transactions

- Patient registration (ADT)
- Study scheduling (Worklist)
- Study status (PPS)
- Result reporting
- Patient reconciliation

Supported Protocols

- DICOM
- HL7
- SQL
- Text files

About Krucom

Krucom AB is a system integration company within healthcare. From our office in Lund, Sweden we focus on the European market and cooperate with providers of diagnostic imaging equipment. With over ten years experience and expert knowledge of the DICOM and HL7 standards we offer solutions in the form of products, consultation services and education.
